## DESCRIPTION

AE4703B is a high performance radome antenna designed for Australia's harsh conditions and the extreme 4WD hobbyist. The antenna base is equipped with a coaxial termination embedded in it's screw to fit spring, allowing a different whip to be installed on the same spring for varying terrains, needs and weather conditions (additional whips not included).

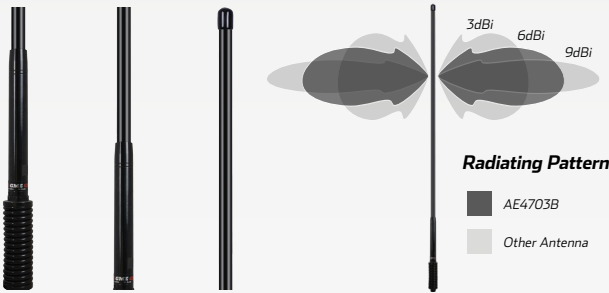

Comes with a 4.5 metre coaxial cable and a PL259 connector.

## FEATURES

- Heavy duty black fibreglass radome antenna
- Stainless steel parallel spring
- Base allows for interchangeable antenna whips
- 6.6 dBi, ground independant antenna

### Comprises

Qty	Description
1	• AW4703B H/D UHF black radome whip
1	• ABL004 antenna base
1	• AS003/B stainless steel parallel spring
1	• 4.5 metre coaxial cable
1	• PL259 connector
