DESCRIPTION

AE4703 is a high performance radome antenna designed for Australia's harsh conditions and the extreme 4WD hobbyist. The antenna base is equipped with a coaxial termination embedded in it's screw to fit spring, allowing a different whip to be installed on the same spring for varying terrains, needs and weather conditions (additional whips not included).

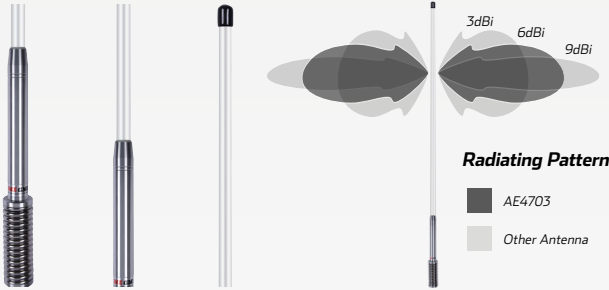

Comes with a 4.5 metre coaxial cable and a PL259 connector.

FEATURES

- Heavy duty white fibreglass radome antenna
- Stainless steel parallel spring
- Base allows for interchangeable antenna whips
- 6.6 dBi, ground independent antenna

Comprises
