DESCRIPTION

AE4705BK is a high performance radome antenna designed for Australia's harsh conditions and the extreme 4WD hobbyist. The antenna base is equipped with a coaxial termination embedded in it's screw to fit spring, allowing different whips to be installed on the same spring for varying terrains, needs and weather conditions (additional whips not included).

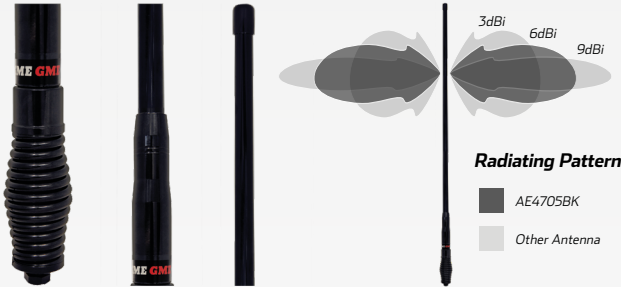

Comes with a protective cover (for when whip is not installed), a 4.5m coaxial cable and a PL259 connector.

FEATURES

- Fibreglass radome whip antenna
- Included protective cover (for when whip is not installed)
- Interchangeable spring base to suit different whips
- 6.6 dBi, ground independant antenna
