DESCRIPTION

AE4705 is a high performance radome antenna designed for Australia's harsh conditions and the extreme 4WD hobbyist. The antenna base is equipped with a coaxial termination embedded in it's screw to fit spring, allowing a different whip to be installed on the same spring for varrying terrains, needs and weather conditions (additional whips not included).

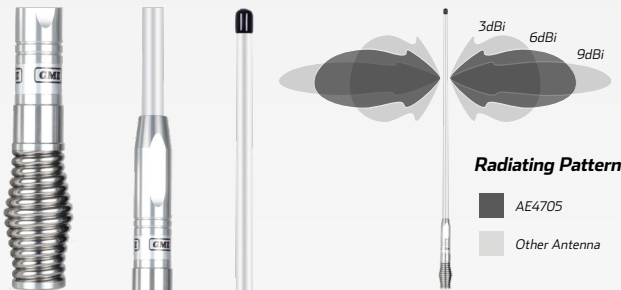

Comes with a protective cover (for when whip is not installed), a 4.5m coaxial cable and a PL259 connector.

FEATURES

- Fibreglass radome whip antenna
- Included protective cover (for when whip is not installed)
- Base allows for interchangeable antenna whips
- 6.6 dBi, ground independant antenna

Comprises
