

15W Personal Folding Solar Panels

#PP15

www.projecta.com.au

DESCRIPTION

A compact monocrystalline folding solar panel. Charges via included power bank to produce 3.0A, 5V output (2x 3.0A USB output & 1 x 3.0A USB-C output), powerful enough to even charge large electrical toys such as drones. Circuit and surge protected. Lightweight and easy to carry, includes carabiners for proper charging angle or mounting.

Comes with a 3-in-1 charging cable

FEATURES

- Compact charging, use of monocrystalline solar cells enable efficient solar charging for electronic devices
- Heat damage resistant temperature treated panel
- Carabiners for secured transport and ideal
- Short circuit & surge protection
- Versatile power supply, 5V charging output
- Lightweight & compact for easy transportation
- Fold-able, easy to transport in or attached to a bag
- Charges through direct sunlight only
- 1 year warranty

Suitable to Charge:

Smart Devices

Smart Watches

Drones

Go Pro

Recharging Powerbank

Carabiners Included

Temperature treated

TECHNICAL SPECIFICATIONS

Includes:

- 3-in-1 charging cable
- Carabiners

Output Current	• 3.0 Amps
Output Voltage	• 5 Volt
Power Input	• Micro USB / 15 Watt solar cells
Battery Bank	• Included (6000mAh lithium ion battery)
Dimensions (Open)	• 630mm x 270mm x 10mm
Dimensions (Folded)	• 270mm x 160mm x 20mm
Weight	• 505 grams total weight
